

# TAPE MAZE

**ULTIMATE  
ACTIVITY CAMPS**

*Inspiring children every day!*

Using masking tape or similar, create a maze on the floor. Dependant on the space you have, you can create a miniature one for toys or you can create a life size one for you to work your way around. If you don't have any tape, you could use string, rolled up bed sheets or paper. (Even chalk if you are outside)

If you have any straws around the house, scrunch up a small bit of newspaper into a ball shape and see if you can blow it around the maze.

You can use extra items to make the maze more difficult, see if you can add in tunnels or bridges!

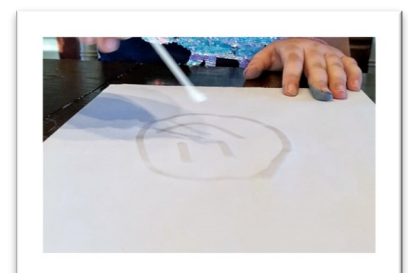

# INVISIBLE INK

**ULTIMATE  
ACTIVITY CAMPS**

*Inspiring children every day!*

You will need a piece of paper, a cotton bud, lemon and a heat source (lamp or hairdryer)

- Squeeze some lemon juice into a glass and mix with a few drops of water
- Dip the cotton bud into the liquid, and draw a simple icon (heart, smiley face, football etc) onto a piece of paper and let dry completely
- Once it has dried, (using an adults help) hold the paper near the heat source
- As the lemon mixture heats up the message you have written should turn brown

After you have done a basic shape, try writing a secret code or message to one of your family members.
